

The Year 12 Geographers had a great time during their residential fieldtrip to Dorset in September 2007, in order to prepare them for their AS Skills Paper. We departed JAGS early on Friday and arrived at Corfe Castle in good time to investigate its site, situation and function. We followed this with a short visit to Old Harry's Rocks, where the girls produced some superb field sketches. On Saturday we spent the day collecting data to determine the processes operating along Chesil Beach. Finally, on Sunday we explored the famous coastal landforms, Durdle Door and Lulworth Cove.

Day 1: Corfe Castle

Day 1: Look, its Old Harry's Rocks!

Day 2: Still smiling, despite having surveyed the 29km long Chesil Beach!

Day 3: Sketching Durdle Door and Lulworth Cove, despite the rain clouds overhead!
