

The 6th form Geographers spent a day in London on Friday 26th September 2008. There were two aims of the day; to discover the impact of flooding in London and the role of the Thames Barrier and to investigate varying populations and land use around Brick Lane. We enjoyed a detailed talk by the Environment Agency at the Thames Barrier and explored the back streets around Brick Lane. Both aspects of the day were core to the AS syllabus and were explored further on return to the classroom.
