

Natural History Museum

On Tuesday 18th November 2008 Year 9 visited the Natural History Museum for the annual Geography and Biology trip. The girls were divided into their science groups and spent half a day studying each subject. Within the Geography element the girls explored the Power Within gallery and they enjoyed The Earth's Treasury, where they saw an array of stunning gems. The girls consolidated work done in class on plate tectonics this term and produced superb workbooks.
