

Year 10 visited Rye and Winchelsea on Tuesday 1st May 2007. After a longer than expected journey from Dulwich we spent an hour in Rye examining the changing functions of the settlement. We then moved on to Winchelsea Beach, where the girls collected data in groups, whilst enjoying the glorious weather! Some girls may choose to use this in their GCSE coursework.

Consolidating work done in Rye

Geography Rocks!

Using the clinometer with great skill!

Super team work!
